<u>Professional Certifications</u>	<u>Organizational Information</u>
BPI Multi-Family Building Analyst, LEED AP, RESNET Home Energy Rater	Architectural Energy Corporation (AEC) is a leading business-to-business energy engineering firm concerned with energy, buildings, and the environment. The mission of AEC is to hasten the transition to a sustainable economy by assisting its clients to improve the energy efficiency, environmental responsiveness, and use of renewable energy in their new and existing buildings.
	C ² Green Development Services specializes in Sustainable Neighborhood Design and development and green Affordable Housing. C ² is a small firm that focuses on delivering excellent value from a holistic design perspective from start to operations for forward thinknig developers and companies.
	EnergyLogic is Colorado's leading provider of home energy efficiency and conservation services. This company has had a role in improving over 10,000 new homes in Colorado. They have also helped homeowners all along the Front Range improve the homes they live in. EnergyLogic help builders and homeowners stop wasting and start saving. They do this by offering the best energy auditing and energy rating services that are available today. EnergyLogic's vision is a future in which all homes have the least possible impact on the Earth. This provider is part of the builder's team and it is the homeowner's advocate to achieve this goal. EnergyLogic is a rapidly growing, progressive company filled with passionate, committed staff members. EnergyLogic strives to eliminate mediocrity and to listen carefully to its clients.
	The IBE staff and graduate student interns work with regional projects to facilitate integrated design through project charrettes, green building research and guidance, and LEED management and documentation.
	YRG provides technical and strategic sustainability consulting services to support a high level of performance, value, and quality in the built environment and within business and organizations.
