

Ensuring The Highest Quality Of Care For Every Resident Of Colorado.

SafeAna | Ensuring the Performance of Care Duties On Time, Every Time

This is an invitation for residential communities, in-home service providers and day programs of all ages to explore becoming beta test participants of SafeAna; [www.safeana.com/en/](http://www.safeana.com/en/). Beta test companies will receive confidential live real-time data of the care provided by their team members at no cost.

SafeAna shows in real-time that well-checks, the administration of medicine and personal care needs are being met as prescribed and required for those in residential care settings, consumers of in-homecare and those that are participants in day programs. SafeAna can also detect falls. The reassurance of care for loved ones is priceless. Now more than ever since we cannot visit our families in residential care. And it is affordable! SafeAna is looking for organizations to participate in the free Beta test of their app. SafeAna is secure, easy to implement, customizable and inexpensive for its customers. The beta test set up is done by the community staff. Making it Covid-19 safe.

To learn more about participating in the free beta test please contact: Barbara Pennell Jaynes [barbara@positively-funded.com](mailto:barbara@positively-funded.com) 303-993-7124 or Jeff Beyle [jbeyle@stickercontrol.com](mailto:jbeyle@stickercontrol.com) 720-432-5001. We are looking forward to meeting with you.
